

# IAM Project Manager

---

## S3 Background

Founded in 2005, S3 is a leading provider of Information Security consulting services for Identity & Access Management (IAM), Governance, Risk and Compliance (GRC), and SAP Security. We employ industry-recognized experts looking to improve the industry, client organizations, and their own personal development.

We also enjoy flexible work arrangements and offer exceptional benefits including:

- 100% paid medical, dental and vision insurance coverage for all employees
- 401k retirement match contributions
- Subsidized educational, health, or personal development programs
- Work from home options

## Position Overview

We are currently seeking an Identity and Access Management (IAM) Project Manager to support multiple clients and internal project teams in the deployment of their IAM programs and initiatives. This position will work directly with client representatives to oversee multiple deployment projects.

This position is based in our Alpharetta, GA headquarters office, with the expectation of in-office work Tuesday-Thursday. Monday and Friday are company-wide remote workdays.

Responsibilities include, but are not limited to:

- Oversee ongoing project activities according to developed project plan
- Manage team schedule and status meetings
- Review and complete submission of weekly status reports
- Collaboration on engagement economics and budgeting where necessary
- Coordination with client teams for any workshops, standing meetings, or touch points
- Daily management and tracking of deliverables, work products, and ensuring task completion by individual team members
- Escalation to Engagement Management of any areas of concern (client or internal), personnel issues, or risk to the engagement
- Monitoring the pulse of the engagement team and client to ensure above expectations delivery
- Ability to guide and act as a facilitator in client workshops as needed
- Ability to manage diverse teams including functional and technical resources, manage engagement economics, client relationship, and expectations management across both consulting and client teams
- General understanding of Identity and Access Management or Application Controls processes

## Foundational Skills

- Effective communication and interpersonal skills (written and verbal) to interact with various levels of client representatives
- Strong program team leadership and interpersonal skills in areas such as teamwork, facilitation and negotiation.
- Strong time management skills
- Ability to identify and analyze problems
- Ability to independently multi-task

## *IAM Project Manager*

---

- Ability to work in a highly integrated and dynamic team environment
- Desire to work on diverse projects with multiple language, cultural, and technical differences
- Ability to work in a dynamic consulting work environment
- Able to travel to client locations
- Ability to develop and manage project plans
- Ability to track and manage project budget

### **Technical Competencies**

- Bachelor's Degree in a relevant subject
- 5+ years of experience in Project Management or Systems and Information Security administration
- General understanding of Information Security frameworks and best practices (e.g. PCI, ISO, NIST)
- Professional designations or certification related to cyber-security, audit information systems, or IT security desirable

Join us to cultivate your career and work with a dynamic and close-knit team of experts who are known for our integrity, 100% client delivery success, and leadership throughout the identity security industry.
